

Spectratek UVTEK 3000

Stanners is proud to introduce the UVTEK3000!

Made in Canada, the expertly created UVLED range is created with the most advanced LED technology to revolutionise the car body repair industry, shortening UV paint curing times to mere seconds.

The digital control board allows selection and display through a simple, multi-language interface.

Complete with a distance sensor to allow the operator to adjust the lamp unit to the proper curing distance.

The UV LED modules are glass protected which can be easily removed for cleaning.

No Heat!

The UVTEK is fitted with the latest LED technology and digital controls.

- Almost instant full cure with no heat
- Very Long Lifetime – more than 35,000 hours
- No Warm-up and cooldown time
- Curing of primers, colour coats and clear coats under 3 minutes (dependant on paint manufacturer)
- Emits only pure UVA radiation (390-400nm), no harmful UVB + UVC
- Uniform Surface Coverage (600mm x 600mm)
