

Spectratek Instacure

Stanners is proud to introduce the Instacure!

Designed and built in Canada, this unit allows easy and complete access to all parts and sections of a vehicle, providing a near instant curing time on all current ultraviolet curable fillers, primers, top coats and clear coats.

The glass protected light lens filters all harmful UVB + UVC radiation, emitting only pure UVA. The lens can be easily removed for cleaning.

The unit can be easily packed for storage in the back of the control box after use, the unit is complete with its own cooling fan in the head to further extend the bulb's life.

- *Almost instant full cure with no heat (8-15 seconds at 75mm from surface)*
- *Long Lifetime – more than 400 hours.*
- *Curing of primers, colour coats and clear coats under 3 minutes (dependant on paint manufacturer)*
- *Emits only pure UVA radiation (360-410nm), filters out all harmful UVB + UVC*
- *Uniform Curing Surface (400mm x 600mm)*
